Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	But it takes a long time	Because The website is not responsive and doesn't have a mobile version	Which makes me feel Frustrated
--------------------	---	-----------------------------	--	-----------------------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A busy critical care nurse managing multiple high-risk patients.	Continuously monitor my patients' vital signs to catch any sudden deterioration early.	I sometimes miss early warning signs of deterioration or get overwhelmed	Traditional monitoring systems rely on static thresholds that don't adapt to individual patient baselines and only	Overwhelmed, anxious, and stressed about patient safety.

			by false alarms.	flag issues after an incident occurs.	
PS-2	A healthcare administrator or lead physician responsible for patient outcomes.	Ensure our care teams respond rapidly to critical health events to improve patient survival rates.	Our care teams are often forced to react too late to severe health events.	We lack a real-time, predictive decision-support system that analyzes live physiological data streams to flag anomalies before they become critical.	Frustrated, reactive, and concerned about the overall quality of care
